printing process.

Option

Sloping rooftop.

GRANIT

10 MM SOLID GRADE LAMINATE

EN438 compliant

Very robust

Custom made/adaptable

Easy maintenance

Lockers are delivered ready to be mounted. As an option, can be factory assembled

Can be installed on feet or socle dont know what this means. it is not an English word

robust

GRANIT

10 MM SOLID GRADE LAMINATE

+ TECHNICAL DATA

- > Frame and doors made of 10mm solid grade laminate.
- > Back made of 4 mm solid grade laminate with vent holes.
- > Panels are suitable for wet environments.
- > Fire classification compliance.

- > Easy and quick to install.
- > Insertion i dont understand this, sorry and screwing of solid grade laminate panels (plates, shelves and upper parts).
- > As an option, can be factory assembled.

- > Units can be assembled from 1 to 4 columns.

- > Stainless steel hinges, fixed on the right side of the doors (standard).

- > Shelve, once installed, have a 2 % slope for water drainage.

- > Stainless steel screws, concealed from the front.

- > Lockers installed on aluminum rails, rectangular 50 x 30 mm.
- > Adjustable feet made of reinforced glass fibre Nylon Alternatively a concrete plinth can be provided by the builder.

- > Option : numbering on each doors.

2. Cubicle with shower screen and rectangular bench

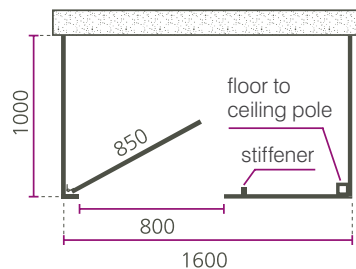

TOILET, SHOWER & CHANGING CUBICLES, UNDRESSING CUBICLES

1. Cubicle door open inward
2. Cubicle door open outward
3. Changing cubicle cubicle with rectangular bench as back cubicle

LATERAL CUBICLE

From largest cubicle side opening door.

TECHNICAL DATA

> Doors, side partitions and pilasters : 13 mm solid grade laminate panels for Corail cubicles and 10 mm solid grade laminate panels for Granit cubicles.

> Adjustable foot from 100 to 140 mm.

> Stainless steel screws (antitamper head) Invisible on front of Corail cubicles (option for Granit cubicles).

> Doors are covering pilasters once installed. Rounded edges. Option : overlapping doors, no additional costs (Corail cubicles only).

> Pivot indicator bolt. Emergency release. Other locks available as an option, see P.36.

> Freestanding side partitions using one panel. Maximum depth : 2,05 m for standard cubicles and 1.85 m for confort cubicles. Chamfered edges.

> Rounded pilasters : safe edges.

> Hardware fittings (3 U brackets and 4 angled brackets) grey lacquered stainless steel.

> 2 door knobs, fixed back to back on each door. Screwed internally : invisible stainless steel screw. Clipped screw cover.

> Grey headrail, 50 mm x 30 mm, placed along pilasters and side partitions.

> 3 Hinges per door on Corail cubicles (2 on Granit cubicles). With or without spring back system.

COMPOSITION **STANDARD CUBICLES**

ANGLED BRACKET

- > Grey stainless steel.
- > Ensure the link between the side partition and the pilaster.

ADJUSTABLE FOOT

- > Reinforced glass fiber
Nylon, grey.
- > Floor clearance from 100 to 140 mm.

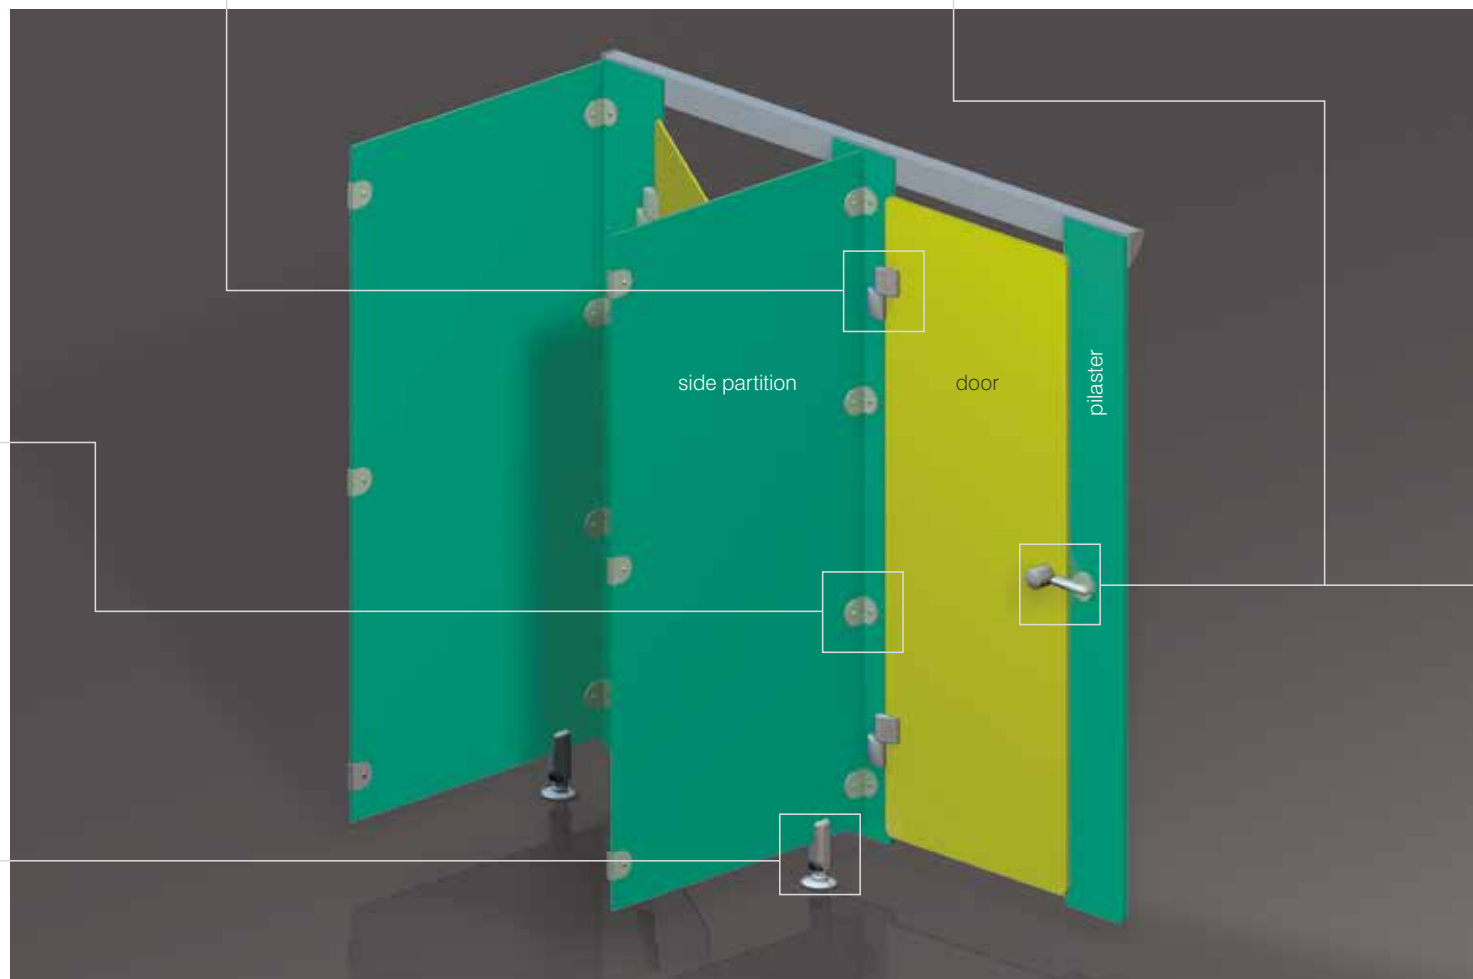

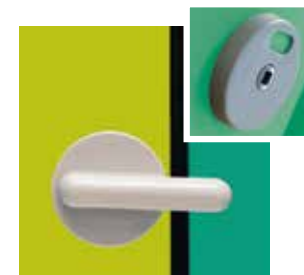

HINGE

- > Reinforced glass fiber
Nylon, grey and brass.
- > Multifunctional, come with spring back system if required, can be used for both, left and right opening doors, fixed pin hinge.

LOCK

- > Nylon, grey.
- > Emergency release from outside, indicator bolt.
- > Lock located on pilaster when doors open inward, on door when doors open outward.
- > Option : other locks, see p.36.

HEADRAIL

- > Grey lacquered aluminum.
- > To brace cubicles and make link between pilasters.

U BRACKET

- > Grey lacquered stainless steel.
- > To fix cubicles on the back wall.

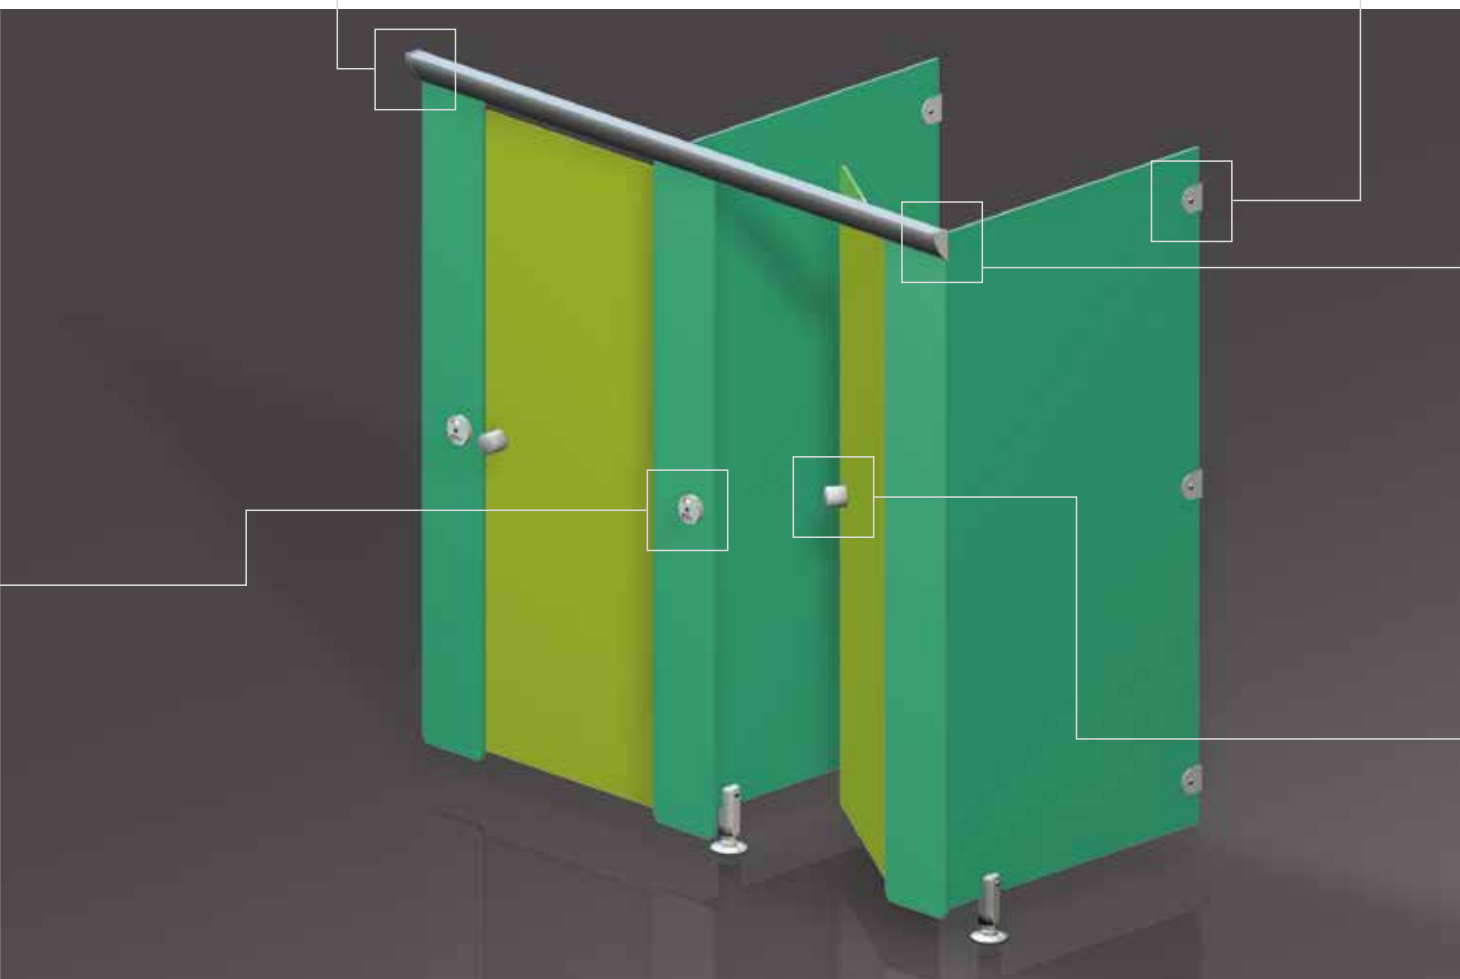

HEADRAIL END CAP

- > Nylon, grey.
- > For the best finish.

DOOR KNOB

- > Nylon, grey.

BUILDING METHODS

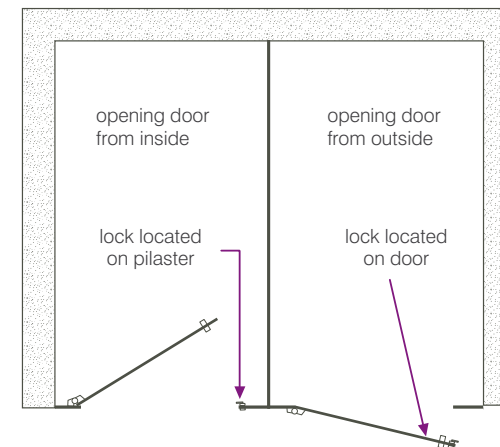

STANDARD CUBICLES

+ OPENING DOOR OPERATION

Opening door from inside

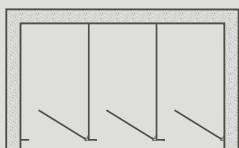

Opening door from outside

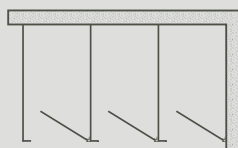

Applicable for standard lock

+ REGULAR LAYOUTS

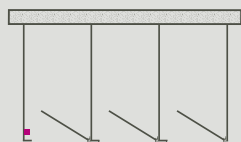

Cubicles between 3 walls

Corner cubicles

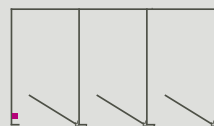

Cubicles against a wall

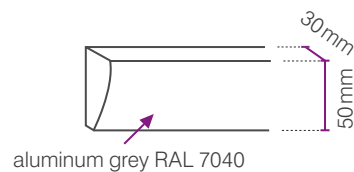

■ Floor to ceiling pole

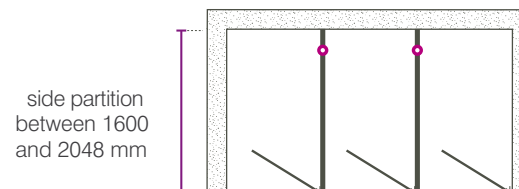

Island type cubicles

+ SIDE PARTITION REINFORCEMENT

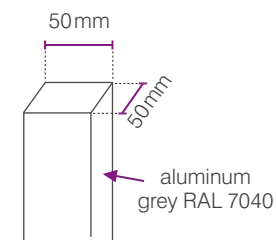

Layouts that require additional foot

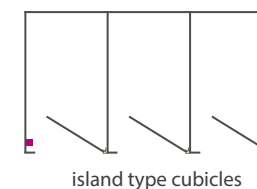

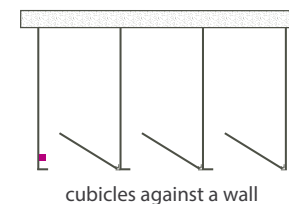

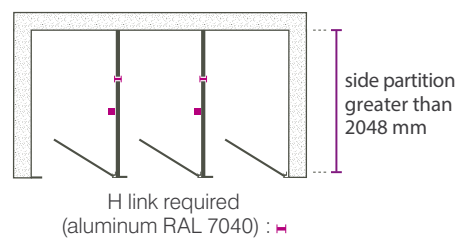

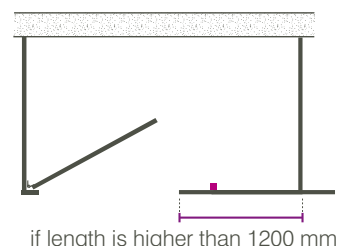

+ FLOOR TO CEILING POLE

- > Ensure the cubicle stability in the layouts below
- > Installed on adjustable foot, Nylon reinforced glass fibre.

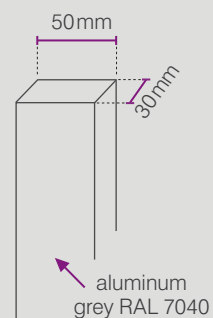

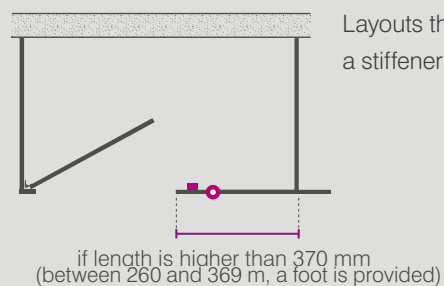

Layouts that require a floor to ceiling pole: ■

+ VERTICAL STIFFENER

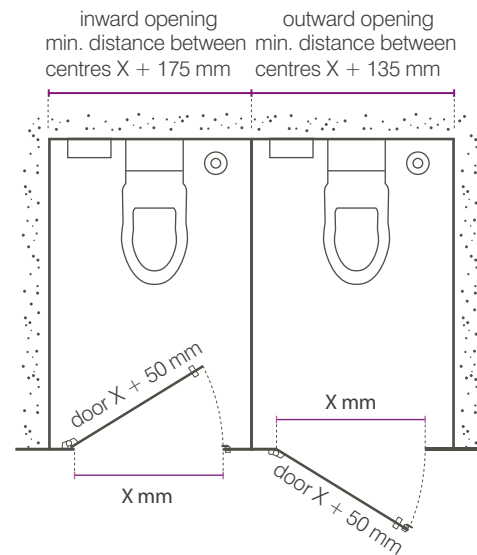

- > Ensure pilaster rigidity if width is larger than 370 mm

DIMENSIONS

GAP BETWEEN PILASTERS

- > Gap between pilasters varies from country to country. Please check applicable regulations in the project country.
- > For example, to have a 800 mm gap between pilasters, a solid grade cubicle needs to have a distance between centres of 935 mm (outward opening) or 975 mm (inward opening)

FIRE CLASSIFICATION

Europe EN 13501-1 Euroclass	B-s2, d0
Austria A3800/1	Tr1, Q1
Switzerland fire classification	5(200°)3
Germany DIN 4102	B1

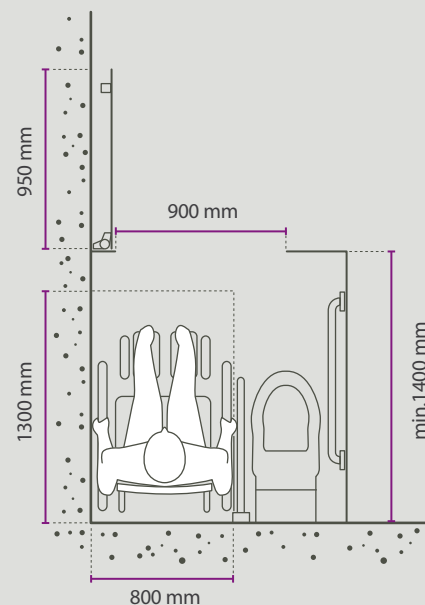

REGULAR LAYOUT CUBICLES FOR DISABLED PERSONS

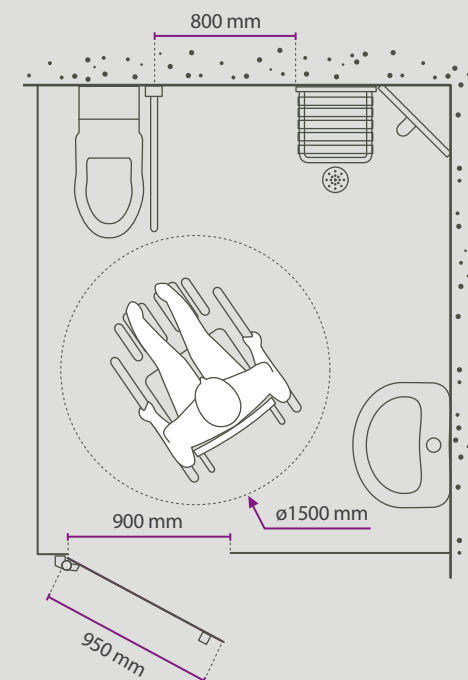

TOILET CUBICLES

- > For front access, a minimum of 800 x 1300 mm rectangular manoeuvring space within the cubicle is required.

SHOWER CUBICLES

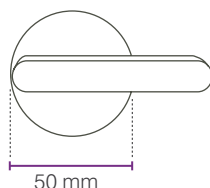

- > A minimum of 1500 mm diameter manoeuvring space within the cubicle is required.

TECHNICAL OPTIONS

+ STANDARD LOCK

- > Injection-molded nylon Indicator bolt.
- > Clipped screw cover.
- > Pivot indicator bolt (4 positions indexed with a full rotation).
- > Corrosion resistant. Unlockable from outside.

Pivot indicator bolt is mounted as a standard on every door.

+ PICTOGRAMS

- > Engraved on the door.
- > Perfect finish. Long durability in any circumstances.
- > 7 standard pictograms :

Special signs (letters or symbols) on study.

+ LOCK AS AN OPTION

SLIDE LOCK

Standard

- > Injection-molded nylon Indicator bolt with reinforced lock with a steel / zinc-plated Ninylon coated insert.
- > Stainless steel. Clipped screw cover.
- > Corrosion resistant. Unlockable from outside.

Slide lock for disabled persons when the lock is too closed from a wall.

SAFETY LOCK

- > Outside lock with key, inside lock with knurled knob.
- > 18-mm travel bolt. One turn of the knob. Flat tumblers lock cylinder Ø 20 mm.
- > Comes with 2 keys.

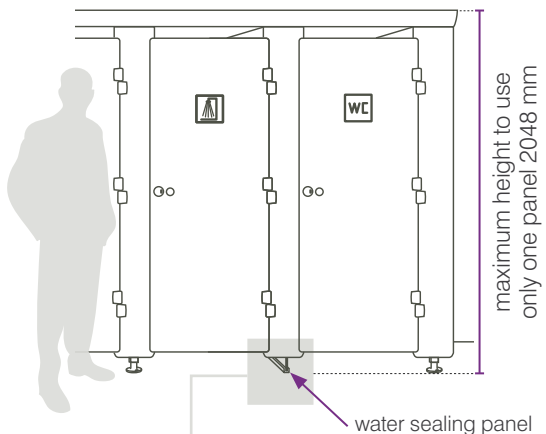

DELIN LATCH LOCK

- > Reversible lock, closing handle with key or knob lock.
- > Metallic grey.

+ WATER SEALING PANEL

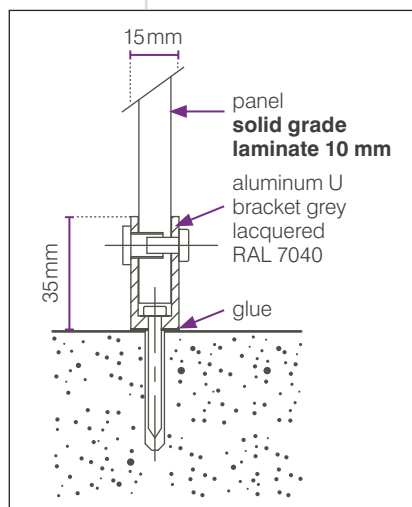

> Prevents waterflow between shower and toilet.

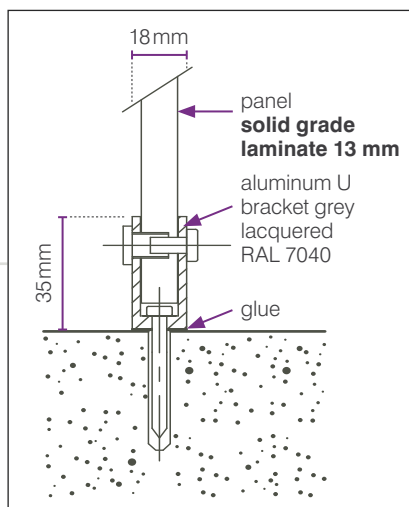

solid grade laminate
10 or 13 mm
